### COMPARING SWIPEAUCTIONS™ TO EBAY

For years, the online auction marketplace was fairly standard - there were eBay, Yahoo! Auctions and a bunch of copycat sites. They all worked the same way: People put up mostly used items for sale, and random people bid on them. The highest bidder would purchase the item and hope the seller was honest enough to send it to them. But, in the past year or two, a new type of online auction has surfaced - the penny auction.

SwipeAuctions work differently than traditional auctions. With SwipeAuctions, there are no third-party sellers, and people must purchase bids to place on auctions in order to win products at lower-than-retail prices.
